

Monthly Update

Old Main Renovation _____ November 2024

Historic pillars revealed

The process of abatement in Old Main began in early October. The pillars pictured above were revealed during work on the second floor. These pillars once graced Mayville Normal School's original library, which was located in Old Main at the time. Most recently, the wall shown separated classroom areas where business classes met. [See more about the move to the current library and the book brigade that made it happen.](#)

Abatement continues

Abatement at Old Main continues. See the photos at left taken on the third floor.

Campus Center elevator progress

The CMU (Concrete Masonry Units) shaft construction, structural steel installation, and shaft roof are complete. Exterior metal panels are being installed. Elevator installation will begin in mid-November, with substantial completion scheduled for late January.
